# FAQs and other things

#### How much yarn does this really take?

Theoretically, Arroyo runs about 400 yards, however it requires being stingy with the cast on and unraveling the swatch. When I was knitting the prototype, I whipped up two different gauge swatches and got fancy with the cast-on, which left me a half row from finishing and no yarn. There was an anxious wait for the UPS dude to bring me more, so be sure to have extra on hand.

## There are extra stitches at the end of the row and I want to finish. Now what?

K2 together and bind-off.

#### How long did this take you?

Six days from cast-on to blocking.
